1. Horizon 2.5.10 release notes

Doc Writer EverTrust R&D v2.5.10, 2025-04-16 :docdate: 2024-09-04 :version: 2.5.10 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

1.1. New Features

[None]

1.2. Enhancements

- [HRZ-2240] - Support San IP and URI on third party renewal.

1.3. Bug Fixes

- [HRZ-2242] - Intune: Changing the filtering process on automatic revocation.

1.4. Known Defects

[None]

1.5. API modifications

[None]

2. Horizon 2.5.9 release notes

Doc Writer EverTrust R&D v2.5.9, 2025-04-16 :docdate: 2024-07-11 :version: 2.5.9 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

2.1. New Features

[None]

2.2. Enhancements

- [HRZ-2102] - Improve the support of wildcard certificates for MSSL PKI.
- [HRZ-2103] - (RPM Install only) Increases the size of HA nodes entry box in the horizon-config utility.

2.3. Bug Fixes

- [HRZ-2104] - (RPM Install only) Fixed a bug where Horizon could not start in HA mode.

2.4. Known Defects

[None]

2.5. API modifications

[None]

3. Horizon 2.5.8 release notes

Doc Writer EverTrust R&D v2.5.8, 2025-04-16 :docdate: 2024-07-05 :version: 2.5.8 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

3.1. New Features

[None]

3.2. Enhancements

- [HRZ-2086] - Improve Migration workflow to allow cross-protocol migration
- [HRZ-2089] - Added team metadata to notifications (display name, description)
- [HRZ-2090] - Added support of MSSL wildcard certificates

3.3. Bug Fixes

- [HRZ-2084] - Added missing keytypes in request select menu
- [HRZ-2013] - Fixed a bug where if a regex has a regex flag (`?i`) specified in configuration, it is not possible to submit a request through the UI

3.4. Known Defects

[None]

3.5. API modifications

[None]

4. Horizon 2.5.7 release notes

Doc Writer EverTrust R&D v2.5.7, 2025-04-16 :docdate: 2024-06-26 :version: 2.5.7 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

4.1. New Features

[None]

4.2. Enhancements

- [HRZ-2080] - Improved CORS policy
- [HRZ-2083] - DomainID in Globalsign MSSL connector is now optional, and will be automatically deduced from the certificate request

4.3. Bug Fixes

- [HRZ-2065] - Fixed URL encoding of state in OIDC redirect URL
- [HRZ-2062] - Fixed a bug that would make notifications fail on `{{request.owner}}` attribute
- [HRZ-2053] - Fixed a bug that allowed duplicate hosts in discovery campaigns
- [HRZ-2049] - Fixed a bug where available teams were duplicated when creating a request
- [HRZ-2048] - Fixed a bug where update was not available through the icon in list view
- [HRZ-2058] - Fixed a bug where special characters in some configuration values could block application start
- [HRZ-2081] - Fixed performance issues on some aggregate queries
- [HRZ-2079] - Fixed a bug where signing algorithm was not checked on Integrated PKI Connector

4.4. Known Defects

- [HRZ-2013] - If a regex has a regex flag `(?i)` specified in configuration, it is not possible to submit a request through the UI. → Fixed in v2.5.8

4.5. API modifications

[None]

5. Horizon 2.5.6 release notes

Doc Writer EverTrust R&D v2.5.6, 2025-04-16 :docdate: 2024-05-27 :version: 2.5.6 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

5.1. New Features

[None]

5.2. Enhancements

- [HRZ-2032] - Dynamic values in JSON REST notifications are now automatically escaped
- [HRZ-2030] - Added owner to requests in order to enable requests on behalf of another user. [Learn more](#)
- [HRZ-1931] - Pki connectors: Improved support of trailing slashes in endpoint
- [HRZ-2018] - CRMP: Added support for UID as data field identifier

5.3. Bug Fixes

- [HRZ-1613] - Request policy values are now properly made empty when the value is not set
- [HRZ-2021] - Propagate button in bulk deny now works on approver comment
- [HRZ-2027] - Fixed a bug that made request inaccessible via direct URL
- [HRZ-2033] - ACME Enrollment with template is now possible
- [HRZ-2034] - Fixed a bug where the ownership tab was not displayed if no owner was defined

5.4. Known Defects

[None]

5.5. API modifications

[None]

6. Horizon 2.5.5 release notes

Doc Writer EverTrust R&D v2.5.5, 2025-04-16 :docdate: 2024-05-07 :version: 2.5.5 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

6.1. New Features

[None]

6.2. Enhancements

- [HRZ-2000] - Add missing metadata in certificate metadata tab in profiles
- [HRZ-2011] - Teams: add a display name and enable localization on team description

6.3. Bug Fixes

- [HRZ-1994] - Fixed a bug where REST URL could not contain dynamic attributes

6.4. Known Defects

[None]

6.5. API modifications

[None]

7. Horizon 2.5.4 release notes

Doc Writer EverTrust R&D v2.5.4, 2025-04-16 :docdate: 2024-04-12 :version: 2.5.4 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

7.1. New Features

[None]

7.2. Enhancements

- [HRZ-1935] - Improved event tracking on scheduled task by adding a traceId for each execution

7.3. Bug Fixes

- [HRZ-1918] - Fixed incorrect maxCertificateStored by holder on IntunePKCS
- [HRZ-1934] - Fixed a bug where GCM synchronization failed if no certificates existed in GCM

7.4. Known Defects

[None]

7.5. API modifications

[None]

8. Horizon 2.5.3 release notes

Doc Writer EverTrust R&D v2.5.3, 2025-04-16 :docdate: 2024-04-05 :version: 2.5.3 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

8.1. New Features

[None]

8.2. Enhancements

- [HRZ-1922] - Added the `{{request.owner}}` notification dynamic attribute

8.3. Bug Fixes

- [HRZ-1911] - Fixed description errors on the permission page
- [HRZ-1902] - Fixed a bug where the event in a groupware notification could be updated even on a referenced notification
- [HRZ-1903] - Fixed a bug where the event in a REST notification could be updated even on a referenced notification
- [HRZ-1921] - Fixed a bug where the Request a challenge buttons were not available for users without authorizations

8.4. Known Defects

[None]

8.5. API modifications

[None]

9. Horizon 2.5.2 release notes

Doc Writer EverTrust R&D v2.5.2, 2025-04-16 :docdate: 2024-03-20 :version: 2.5.2 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

9.1. New Features

[None]

9.2. Enhancements

- [HRZ-1884] - Improved trust chains display in Registration Authority to display the Certificate Authority's Common Name as title
- [HRZ-1863] - Improved EST Renewal behavior to no longer generate empty authorizations
- [HRZ-1789] - Added support of TACACS authentication for F5
- [HRZ-1880] - Improved CSRF behavior when no authentication cookie is present
- [HRZ-1887] - Added unique function in computation rules
- [HRZ-1888] - Added possibility to create missing entry in LDAP trigger

9.3. Bug Fixes

- [HRZ-1882] - Fixed a bug where the number of ACME-External profiles in configuration overview was always 0
- [HRZ-1876] - Fixed a bug where renewal request approval popup was not displayed in some cases
- [HRZ-1873] - Fixed a bug where EST enroll with label filters would not authorize enrollment
- [HRZ-1875] - Fixed a bug where cron expression explanation concerning day of week was incorrect

9.4. Known Defects

[None]

9.5. API modifications

[None]

10. Horizon 2.5.1 release notes

Doc Writer EverTrust R&D v2.5.1, 2025-04-16 :docdate: 2024-02-26 :version: 2.5.1 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

10.1. New Features

[None]

10.2. Enhancements

- [HRZ-1865] - `AES_STRONG` option in PKCS#12 generation is now fully compatible with openssl v3 without legacy mode

10.3. Bug Fixes

- [HRZ-1866] - Intune enrollments do not fail anymore

10.4. Known Defects

[None]

10.5. API modifications

[None]

11. Horizon 2.5.0 release notes

Doc Writer EverTrust R&D v2.5.0, 2025-04-16 :docdate: 2024-02-07 :version: 2.5.0 :numbered:

Here are the release notes for EverTrust Horizon v2.5, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING | `horizon-upgrade` tool no longer supports `mongo` legacy shell. `mongosh` is now required.

11.1. New Features

- [HRZ-1353] - Credentials are now regrouped in a dedicated section and can be used by multiple targets
- [HRZ-1393] - Adding the capability to send REST notifications
- [HRZ-1561] - Adding the capability to enroll an ACME certificate on a public PKI, and manage it on Horizon
- [HRZ-1572] - Adding an `Authorized` mode in SCEP protocol to allow enrollment by a challenge containing credentials of a user with enroll permissions
- [HRZ-1630] - Adding the capability to receive notifications for the license expiration, the license usage and credentials expiration
- [HRZ-1559] - Adding Eviden IDCA support
- [HRZ-1575] - Add Google Certificate Manager support
- [HRZ-1397] - Adding RHEL9 support
- [HRZ-1478] - The administration interface of Horizon has been revamped to enhance user experience
- [HRZ-1731] - Adding the capability to customize the interface by adding a logo on the Web interface in the header and in the login menu

11.2. Enhancements

- [HRZ-1599] - Setting a password is now part of the Local Identity creation workflow
- [HRZ-1384] - Adding the support of Edwards Curves
- [HRZ-1586] - Adding the support for new license calculation mode
- [HRZ-1629] - Notification can be sent to all members of a team
- [HRZ-1576] - Change the p7b format from base64 only to the PEM format
- [HRZ-1809] - Charts can now be duplicated in a custom dashboard
- [HRZ-1736] - Adding polar and pyramid charts
- [HRZ-1834] - Renaming Reenroll to Duplicate in WebRA workflow

11.3. Bug Fixes

- [HRZ-1583] - The PKI Connector Manager actor is now notified when a HTTP proxy is updated
- [HRZ-1799] - Setting a team via computation rule on the request information now properly works

11.4. Known Defects

[None]

11.5. API modifications

- [HRZ-1572] - The `authorizationMode` parameter is now mandatory on SCEP profiles. It replaces the `mscepEmulation` boolean with the `ndes` mode, and has `challenge` and the new `authorized` mode
- [HRZ-1728] - The `authorizationMethods` parameter is now mandatory on ACME profiles
- [HRZ-1353] - PKI and Third Party Connectors, OpenID identity providers, SCEP, Jamf and Intune profiles now use credentials
