Table of Contents

1. Horizon 2.6.9 release notes

Doc Writer EverTrust R&D v2.6.9, 2025-04-16 :docdate: 2024-12-19 :version: 2.6.9 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| **WARNING** | Horizon now requires Java version 17. |

1.1. New Features

[None]

1.2. Enhancements

- [HRZ-2503] - LDAP: Added possibility to map a certificate attribute to a LDAP attribute to find the related record
- [HRZ-2484] - CRMP: `dataFieldIdentifier` can now be linked to a label
- [HRZ-2504] - Improved performance when saving a certificate profile
- [HRZ-2486] - Improved error codes for WebRA renewal
- [HRZ-2422] - Changed Nameshield connector API version

1.3. Bug Fixes

- [HRZ-2498] - `principal.certificate` dictionary is now properly available in computation rules
- [HRZ-2478] - Fixed a bug where DN value was set to an empty string in notifications when using an EST/SCEP profile without subject/san/extensions template
- [HRZ-2496] - Fixed a display bug when selecting teams in request while being unauthenticated

1.4. Known Defects

[None]

1.5. API modifications

- [HRZ-2503] - LDAP Connector: `userIdentifierAttribute` must now be a valid LDAP field, and `certificateAttribute` references a DN or SAN field to search with. Refer to the API documentation for more details

2. Horizon 2.6.8 release notes

Doc Writer EverTrust R&D v2.6.8, 2025-04-16 :docdate: 2024-11-19 :version: 2.6.8 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| WARNING | Horizon now requires Java version 17. |

2.1. New Features

[None]

2.2. Enhancements

- [HRZ-2406] - Added Title Distinguished Name element
- [HRZ-2412] - Improve Stream connector CA fetching to allow for revocation only CAs

2.3. Bug Fixes

- [HRZ-2418] - Fixed issues with the GlobalSign MSSL connector in specific cases
- [HRZ-2420] - Fixed error messages displaying BSONObjectID on request denial/cancellation
- [HRZ-2397] - Fixed error where renewal was not possible on UI when using a centralized and decentralized profile with a manual password policy

2.4. Known Defects

[None]

2.5. API modifications

[None]

3. Horizon 2.6.7 release notes

Doc Writer EverTrust R&D v2.6.7, 2025-04-16 :docdate: 2024-11-12 :version: 2.6.7 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| WARNING | Horizon now requires Java version 17. |

3.1. New Features

[None]

3.2. Enhancements

- [HRZ-2380] - Added compatibility for Teams Webhooks with new Power Automate workflow webhooks
- [HRZ-2364] - Revocation triggers now trigger on external revocation (when the CRL is updated)
- [HRZ-2031] - Certificate notifications are not sent anymore when the certificate is imported after its scheduled date

3.3. Bug Fixes

[None]

3.4. Known Defects

[None]

3.5. API modifications

- [HRZ-2031] - Removed `activationDate` parameter on profile trigger configuration

4. Horizon 2.6.6 release notes

Doc Writer EverTrust R&D v2.6.6, 2025-04-16 :docdate: 2024-10-28 :version: 2.6.6 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| **WARNING** | Horizon now requires Java version 17. |

4.1. New Features

[None]

4.2. Enhancements

- [HRZ-2362] - CRMP: Add CN as available data field identifier

4.3. Bug Fixes

- [HRZ-2363] - WCCE: Fixed a bug where AD Caller Identity's employee ID was not available

4.4. Known Defects

[None]

4.5. API modifications

[None]

5. Horizon 2.6.5 release notes

Doc Writer EverTrust R&D v2.6.5, 2025-04-16 :docdate: 2024-10-25 :version: 2.6.5 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING	Horizon now requires Java version 17.

5.1. New Features

[None]

5.2. Enhancements

- [HRZ-2332] - Certificate template is now available for Intune
- [HRZ-2345] - OTPKI Connector now supports using a label as the zone value
- [HRZ-2344] - Nameshield connector now uses v2 endpoints
- [HRZ-2138] - Expired SCEP Registration Authorities are now greyed out
- [HRZ-2331] - Bulk revocation now requires confirmation
- [HRZ-2333] - ADCallerIdentity is now available in computation rules in EOBO mode
- [HRZ-2346] - More options are available for signing algorithm research

5.3. Bug Fixes

- [HRZ-2328] - Datasource specific permissions can now be set

5.4. Known Defects

[None]

5.5. API modifications

[None]

6. Horizon 2.6.4 release notes

Doc Writer EverTrust R&D v2.6.4, 2025-04-16 :docdate: 2024-10-15 :version: 2.6.4 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING	Horizon now requires Java version 17.

6.1. New Features

[None]

6.2. Enhancements

[None]

6.3. Bug Fixes

- [HRZ-2309] - System notifications are now sent only when configured
- [HRZ-2310] - Fixed a bug affecting SCIM synchronization with Entra

6.4. Known Defects

[None]

6.5. API modifications

[None]

7. Horizon 2.6.3 release notes

Doc Writer EverTrust R&D v2.6.3, 2025-04-16 :docdate: 2024-10-07 :version: 2.6.3 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| **WARNING** | Horizon now requires Java version 17. |

7.1. New Features

[None]

7.2. Enhancements

- [HRZ-2138] - SCEP based profiles now properly check for expired SCEP registration authorities
- [HRZ-2286] - Serial number now properly displays leading zeros
- [HRZ-2288] - Intune properly uses authenticated proxies
- [HRZ-2287] - Adding WinHorizon pre-configured role
- [HRZ-2292] - Escaping CSV formulas following OWASP recommendations

7.3. Bug Fixes

- [HRZ-2244] - Fixed a bug that could display wrong information on the certificate dashboard
- [HRZ-2280] - Fixed a bug that made request unapprovable after migration to 2.6
- [HRZ-2289] - Fixed a bug that could display the wrong DN when approving pending enroll requests
- [HRZ-2275] - Fixed a bug that could lead to a wrong pagination on searchable view
- [HRZ-2291] - EST/SCEP requests with computation rule are now approvable

7.4. Known Defects

[None]

7.5. API modifications

[None]

8. Horizon 2.6.2 release notes

Doc Writer EverTrust R&D v2.6.2, 2025-04-16 :docdate: 2024-09-10 :version: 2.6.2 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

| **WARNING** | Horizon now requires Java version 17. |

8.1. New Features

`[None]`

8.2. Enhancements

- `[HRZ-2209]` - Adding the license expiration to the metrics
- `[HRZ-2210]` - Block recovering request on non escrowed certificate
- `[HRZ-2249]` - Fixing typo in the cookbook

8.3. Bug Fixes

- `[HRZ-2243]` - Intune: Changing the filtering process on automatic revocation
- `[HRZ-2238]` - On EST/SCEP Challenge request the DN is now usable in the notification dynamic attribute
- `[HRZ-2245]` - Fixing metapki enrollment crashing the apps
- `[HRZ-2211]` - Support San IP and URI on third party renewal

8.4. Known Defects

- A migration issue affects requests:
  - Pending requests for renewal cannot be validated
  - Approved requests are missing some information and PKCS#12 cannot be downloaded

    This issue has been fixed in version 2.6.3

8.5. API modifications

`[None]`

9. Horizon 2.6.1 release notes

Doc Writer EverTrust R&D v2.6.1, 2025-04-16 :docdate: 2024-09-02 :version: 2.6.1 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING	Horizon now requires Java version 17.

9.1. New Features

[None]

9.2. Enhancements

[None]

9.3. Bug Fixes

- [HRZ-2212] - Fixed a bug where the automation policy metadata could not be set by the Horizon Client

9.4. Known Defects

- A migration issue affects requests:
  - Pending requests for renewal cannot be validated
  - Approved requests are missing some information and PKCS#12 cannot be downloaded

    This issue has been fixed in version 2.6.3

9.5. API modifications

[None]

10. Horizon 2.6.0 release notes

Doc Writer EverTrust R&D v2.6.0, 2025-04-16 :docdate: 2024-08-22 :version: 2.6.0 :numbered:

Here are the release notes for EverTrust Horizon v2.6, released on 2025-04-16.

For the installation and upgrade procedure, please refer to the Installation and Upgrade guide.

WARNING	Horizon now requires Java version 17.

10.1. New Features

- [HRZ-1664] - Added support for basic authentication on HTTP Proxies
- [HRZ-1946] - Added datasources: external data can now enrich enrollment metadata
- [HRZ-1970] - Added auto validation on SCEP, EST and WebRA: certificates matching a set of rules can now be enrolled without any further validation by an operator
- [HRZ-1956] - Added SCIM v2 compliance: Horizon accounts can now be automatically synchronized with SCIM Providers (Entra, Okta, …)
- [HRZ-1995] - Added automatic healthcheck for Stream, Acme, ADCS, DigiCert, EJBCA, GlobalSignMSSL, NameShield and Opentrust PKI connectors
- [HRZ-2051] - Added the Nameshield PKI Connector
- [HRZ-1910] - Teams can now be used in HPQL

10.2. Enhancements

- [HRZ-2101] - Crypto decoder now displays unknown extensions
- [HRZ-1966] - Crypto decoder now supports OpenSSH certificates, Timestamping Tokens and OCSP Tokens
- [HRZ-2059] - Added the possibility to selectively enable features depending on the hostname. Learn more
- [HRZ-2068] - EST/SCEP: Computation rule execution now takes place on challenge request submission
- [HRZ-1995] - Improved configuration workflow for the Stream connector
- [HRZ-2063] - Added CSV capabilities for Events and Discovery Events on search and report interfaces
- [HRZ-1881] - Notifications now also support computation rule manipulation inside dynamic attributes
- [HRZ-2108] - Added the possibility to search if a certificate is escrowed or not
- [HRZ-2114] - Added support of additional endpoints on Sectigo SCM PKI connector
- [HRZ-2115] - MetaPKI connector now supports Unique Identifier DN Element
- [HRZ-2078] - WCCE: AD Caller identity's distinguished name dictionary is now available

10.3. Bug Fixes

- [HRZ-2106] - Fixed incorrect configuration key for request grace period and default duration
- [HRZ-2100] - Fixed a bug that prevented HQL requests to be saved when modified
- [HRZ-1546] - Fixed a bug that allowed WebRA requests to be approved concurrently
- [HRZ-2025] - Fixed a bug that made long running scheduled tasks appear as failed
- [HRZ-1853] - Mongo Driver: Fixed a bug that made database results incomplete in non primary mode. This will improve performance when connected to a mongo cluster once the connection string has been modified

10.4. Known Defects

- A migration issue affects requests:

  - Pending requests for renewal cannot be validated

  - Approved requests are missing some information and PKCS#12 cannot be downloaded

    This issue has been fixed in version 2.6.3

- Authenticated proxies are not available for Intune, SOAP and LDAP Connections.

10.5. API modifications

- [HRZ-1881] - In REST notifications (`/api/v1/triggers`), `body` and `bodyType` parameters were renamed to `payload` and `payloadType`
- [HRZ-1970] - Added the `authorizationMode` mandatory property on WebRA profiles (`/api/v1/certificate/profiles`)

| WARNING | The Akka framework has been replaced by Pekko. It can lead to configuration changes if you manually manage the Horizon configuration. |
